Description

MainOne Cable is seeking a highly skilled and motivated Network Engineer to join our dynamic team. As a Network Engineer, you will play a crucial role in designing, implementing, managing, and maintaining our network infrastructure. The ideal candidate will have a strong background in networking technologies, excellent problem-solving skills, and a passion for staying up-to-date with the latest industry trends.

Responsibilities

- Design, implement, and manage MainOne Cable's network infrastructure.
- Troubleshoot and resolve network issues to ensure optimal performance and reliability.
- Collaborate with cross-functional teams to implement network solutions that align with business objectives.
- Conduct regular network assessments and implement improvements to enhance efficiency.
- Stay abreast of industry trends and emerging technologies to recommend innovative solutions.
- Monitor network security and implement measures to safeguard against potential threats.
- Provide technical support and guidance to internal teams and external partners.
- Participate in the planning and execution of network-related projects.

Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Proven experience as a Network Engineer or similar role.
- In-depth knowledge of networking protocols, routing, and switching.
- Hands-on experience with network hardware and software, including routers, switches, firewalls, and load balancers.
- Familiarity with network monitoring tools and security protocols.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Relevant certifications such as CCNA, CCNP, or equivalent.

Job Benefits

- Competitive salary and performance-based incentives.
- Comprehensive health and dental insurance.
- Professional development opportunities and ongoing training.
- Flexible work schedule.
- Collaborative and innovative work environment.
- Employee assistance programs and wellness initiatives.
