Nrc Requirements | Apply Online Form 2025

Description

We are seeking a highly motivated and detail-oriented individual to join our team as an NRC Requirements Analyst. In this role, you will be responsible for analyzing and documenting the requirements for various projects in accordance with the Nuclear Regulatory Commission (NRC) standards. The ideal candidate will possess strong analytical skills, attention to detail, and the ability to work collaboratively in a dynamic environment.

Responsibilities

- Collaborate with project stakeholders to gather and analyze NRC requirements.
- Document and maintain detailed requirements specifications for software and system development projects.
- Conduct requirement reviews and validations to ensure accuracy and completeness.
- Work closely with cross-functional teams to translate business needs into technical solutions.
- Participate in the development and execution of test plans to validate requirements.
- Keep abreast of NRC regulations and industry best practices to ensure compliance.
- Provide support during regulatory audits and inspections.

Qualifications

- Bachelor's degree in Computer Science, Engineering, or a related field.
- Proven experience as a requirements analyst or in a similar role.
- Knowledge of NRC regulations and guidelines.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Ability to work independently and collaboratively in a team.
- Attention to detail and a commitment to producing high-quality work.
- Familiarity with software development life cycle (SDLC) processes.

Job Benefits

- Competitive salary commensurate with experience.
- Health, dental, and vision insurance coverage.
- 401(k) retirement savings plan with employer matching.
- Paid time off and holidays.
- Professional development opportunities.
